EEK! Sorry to hear that it's still awful. It's one of the worst kind of pains! Good luck.

If it's just to us within EPA, then I'm pretty sure you're fine sending the notes to the group without me looking at them.

Cheers,

Mario

Of course! And when I send the call summary notes (I'm trying to condense them down from 6 pages - holy moly) is it ok if I just send them to you first for your perusal, then to the group? Or what's your preference?

Tooth was throbbing at 4 a.m. ugh. thank goodness for ibuprofen! I have a 3pm appointment with a different dentist. Hopefully, he will find the problem.

Great! Would you mind circling back with the group using the last group email to let everyone else know about this?

Thanks. How's the tooth ache this morning?

Thanks so much Mario.

Pete said NDDEQ intends to include the "instantaneous" footnote.

Ouch that sounds awful. I hope it's all better now. No worries on the language. We just want to make sure we're being responsive to ND and their time table.

Hi Mario, I'll let you know what I hear back from Pete and Karl on the comment bubbles in Table 1 regarding the frequency and duration associated with fish tissue numbers. I had only asked them about the footnotes previously, as I didn't see the comment bubbles.

Sorry for the delay in responding to you. I was at the dentist earlier trying to figure out the cause of a bad toothache. The saga continues tomorrow afternoon. Good times.

Have a great evening.
Holly

Holly, any feedback from ND on Karen's comment bubbles in Table 2 regarding the frequency and duration?

Hi Mario, Karl Rockeman from ND DEQ recommends the edits in red below to the language in the footnotes.

Thanks. I hope everyone's weekend was great. Talk with you soon.

Dear Holly:

How about replacing (EPA with 40CFR131)? See below.

Pete

Replace

U.S. EPA-approved site-specific water column criterion element

With

Site specific water column criterion element established under the provisions of 40CFR131

And replace

,once they are duly adopted, and approved by U.S. EPA

With

once duly established under the provisions of 40 CFR 131

Dear Holly:

Initial impression "this is good". I will run it by Karl.

Thanks for all your help.

Hi Pete, I hope all is well!

I know your plate is full so I'll be brief. Per our conversation on Monday, attached for your review are EPA's recommended revisions to footnote 4 in Table 1 and footnote 17 in Table 2. Please let me know if you have any comments or questions.

Also, I'm putting together a summary of the discussion on Monday with NDDEQ and Office of Water. I'll send it to you once I'm done to make sure I accurately captured the discussion. I intended to send it today, but work keeps getting in the way LOL...

Thanks so much! Talk with you soon.
